**Paris Decrees Knitted Fabrics**

SO it is from Paris that we have brought a ravishing array of knitted silk dresses, boasting metallic knitted trimmings; impudent little hand-loomed skirts that beg to be worn on the golf course; and soft, fleecy wraps for Southern wear.

One may find here dresses, knitted wraps with brushed wool collars of engulfing proportions, and silk and wool sweaters suddenly departing from the usual.

About them all there is that something—that speaks French conception and French workmanship.

For Successful Winter Photography we recommend the Graflex Cameras

Fitted with F-4.5 Bausch & Lomb Tessar Lenses. Winter photography requires a fast lens and a good shutter. These famous cameras are fitted with both. They have the additional advantage of showing the scene, right side up, on the ground glass, until the instant the exposure is made. They are adapted to indoor and outdoor work, with either films or plates, and their speedy lenses insure successful snapshots on dark days. Newspaper photographers cannot take chances on losing a picture, and so the majority of them use the Graflex.
